

Name : **Vaishnavi Bharat Gangurde**

Roll No : **25**

Division : **A (SE-Comp)**

Problem Statement :

Write a c++ program to print 'Greater' if x value is greater than y else print 'Lesser'.

Source Code :

```
#include <iostream>
using namespace std;

int main()
{
    int x, y;

    cout << "Enter the first number: " << endl;
    cin >> x;
    cout << "Enter the second number: " << endl;
    cin >> y;

    if (x > y)
    {
        cout << "X is greater number than Y" << endl;
    }
    else
    {
        cout << "X is lesser number than Y" << endl;
    }

    return 0;
}
```

```
/*
```

```
OUTPUT:
```

```
i)
```

```
Enter the first number:
```

```
546
```

```
Enter the second number:
```

```
412
```

```
X is greater number than Y
```

```
ii)
```

```
Enter the first number:
```

```
5000
```

```
Enter the second number:
```

```
6522
```

```
X is lesser number than Y
```

```
*/
```
